

“Green” is a buzzword these days. And kids want to learn about being green. This toolkit will help your energy company to host a *Green Energy Summer Camp* for middle and/or high school students. This camp is designed to be one-week in length with hands-on science and math activities, a company tour, and the opportunity to talk to your employees about their jobs. The goals for the camp are to learn about green energy, get excited about what happens at energy companies, and find out about available careers.

This toolkit provides everything your energy company needs to launch two separate Green Energy Summer Camps, one for middle school students and one for high schools students. Companies may choose to do one or the other, or both. It is recommended that each be held separate weeks during the summer. The toolkit includes:

- Task list
- Materials list
- Program agenda
- Detailed lesson plans
- One-pager to bring to schools
- *A Day in the Life* questions
- Student flyer
- Student registration form
- Student evaluation form

If you need any assistance in setting up or managing a *Green Energy Summer Camp* program, feel free to contact Valerie Taylor, CEWD Educational Consultant, at 703.752.1769 or [valerie@cewd.org](mailto:valerie@cewd.org).
