 - Celebrate and recognize those working in energy sector
 - Identify opportunities to introduce careers in secondary and post secondary education
- Who was our contact to petition for Proclamation?
 - Senior Editor and proclamation Coordinator at the Office of the Governor

"Careers in Energy" Week Proclaimed

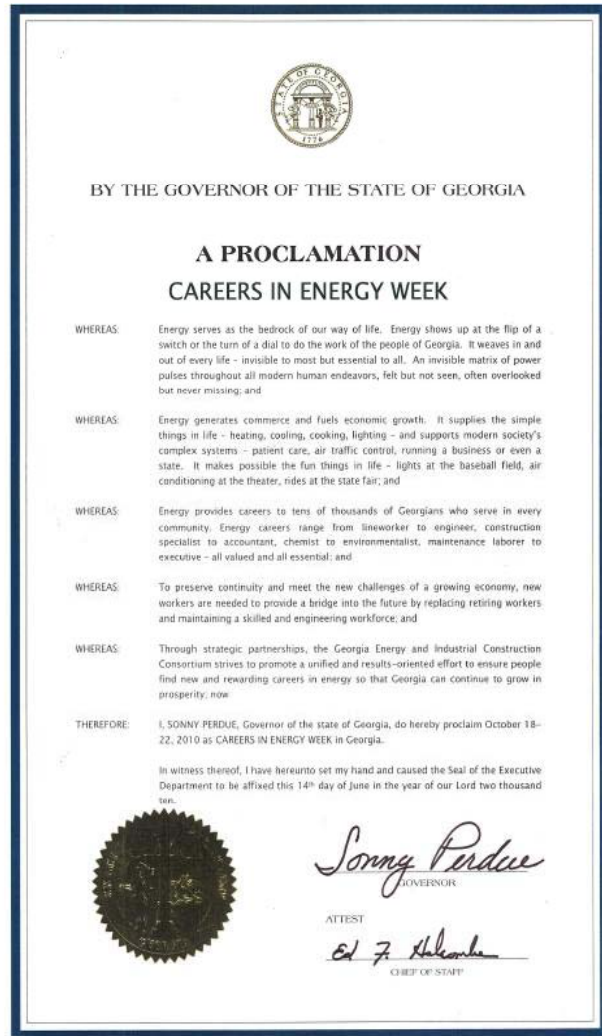

- Energy serves as the bedrock of our way of life.
 - Energy shows up at the flip of a switch or the turn of a dial to do the work of the people of Georgia. Energy weaves in and out of every life – invisible to most but essential to all. An invisible matrix of power pulses throughout all modern human endeavors, felt but not seen, often overlooked but never missing.
- Energy generates commerce and fuel economic growth.
 - Energy supplies the simple things in life – heating, cooling, cooking, lighting. Energy supports modern society's complex systems – patient care, air traffic control, running a business or even a state. Energy makes possible the fun things in life – lights at the baseball field, air conditioning at the theater, rides at the state fair.
- Energy provides careers to tens of thousands of residents who serve in every community.
 - Energy careers range from line worker to engineer, construction specialist to accountant, chemist to environmentalist, maintenance laborer to executive – all valued and all essential
 - Whereas, to promote continuity and meet the challenges of the growing economy, new workers are needed to bridge into the future by replacing retiring workers and maintaining a skilled and engineering workforce.
 - Whereas, through strategic partnerships the Georgia Energy & Industrial Construction Consortium strives to promote a unified and results-oriented effort to ensure people find new and rewarding careers in energy so that Georgia can continue to grow in prosperity.

Building Georgia's Future Energy and Industrial Construction Workforce

Careers in Energy Week Proclaimed October 18 – 25, 2010

This Proclamation : Raise awareness of Careers in Energy. Celebrations will be held to highlight those working in energy and those who may be interested in careers in energy. Urges all citizens to become familiar with the services and benefits offered by the career and technical education programs in this community and to support and participate in these programs to enhance their individual work skills and productivity.
