

The National Energy Educator Network (NEEN) is an assembled group of educators that work with CEWD member companies to enable their energy talent pipeline solutions. NEEN members are granted membership based on CEWD utility member sponsorship and have full access to CEWD content.

NEEN schools work with CEWD member companies to implement education solutions (like stackable credentials, competency based curriculum, industry recognized credentials and assessments) that help prepare potential new hire candidates for jobs in the utility industry. NEEN members openly share best practices with CEWD members as well as other NEEN members to streamline and strengthen their talent pipeline development processes and programs.
